

Phantom - RESCUE DUMMIES

The Phantom evacuation mannequin, has been developed for training evacuation and medical procedures carried out in adverse operational conditions for:

- Army, Police, Firefighters,
- Medical, mountain, chemical, mining or industrial rescue services,
- Pro-defence organisations, associations and training companies.

The mannequin is made using certified materials with very high mechanical strength parameters, reinforced with polyester/polyamide tapes with a strength of 1,100 kg.

Phantom RESCUE DUMMIES

Unobstructed upper airway allows for instrument operation:

- Includes: NG tube / I-gel mask / self-expanding bag / face mask
- Suctioning of upper airway contents,
- Listening for breathing - speaker and sound files included,

- the design of the torso allows compressions to be performed with visible chest relaxation,
- split limbs allow for simulated fractures and traumatic amputations,
- pocket in the armpit area for practising wound packing,

The mannequin set also features:

- a sheet stretcher,
- two small wounds to simulate traumatic penetration of the chest,
- a narrow wound to be placed on the shoulder or neck of the mannequin,

*dimensions: height 190 cm,
weight 50 to 80 kg
